

ELEGANT SENIOR LIVING

Cascade Trails
Grand Rapids, MI

StudioCraft was brought in to build and install high-end elements for a newly built senior living center with the goal of creating a functional, welcoming environment for residents, family, and staff.

Our team collaborated closely with McGlynn Design Group to develop this space, from selecting materials to creating detailed renderings of each element. Highlights of the project include a three-sided reception desk with ENVI Porcelain, a café counter with wavy Interlam façade, and custom shelving for the living area.

StudioCraft was heavily involved from start to finish to ensure quality was visible in the final product, including on-site finishing to create seamless joints in large components.

The end product is a warm and welcoming – yet functional space that gets daily use by residents, family and visitors to the facility.
