

## FINDING MORE WAYS TO WIN

CHI Franciscan Health Harrison  
Acute Care Seattle, WA

StudioCraft's extensive capability portfolio is a valuable benefit to our dealer partners. We can support most requests.

A superior example of this is a cafeteria project we completed for CHI Franciscan Health's Harrison Acute Care hospital on the Olympic Peninsula. The dealer, CHI, and NBBJ collaborated with StudioCraft to build cafeteria tables and benches that offered a consistent and refined aesthetic.

In order to create durable yet attractive tables, we began by building steel frame tables clad in solid surface. For a subtle, yet impactful accent, we added woodgrain laminate to the inside of the legs. These tables required precise and robust fabrication in order to withstand the rigors of a 24-hour healthcare environment.
