

A WARM RECEPTION

Kaiser Permanente
Tracy, CA

When it comes to creating a welcoming experience for patients, clinicians, and staff, one of the most important points of contact is the registration desk.

The client wanted an easy-to-adapt modular solution that would achieve a warm, welcoming aesthetic in their reception area. Our dealer partner provided StudioCraft with plans for an intricate linear Corian pattern that required extremely precise fabrication.

To achieve this, we mitered the joints perfectly to achieve the desired waterfall look. While the desk's exterior showcases the beauty of custom fabrication, the interior of the desk is still modular. That means it will be easy for the client to make changes to interior features in the future.

More so, the desk meets the high-capacity power and data demands of a busy medical center.
