

ENHANCING THE AUTO EXPERIENCE

Sonic Automotive Dealerships

StudioCraft's expansive custom fabrication capabilities are perfect for delivering branded furniture elements to auto dealerships. Benefits of this approach include accelerated installation processes and consistent, on-brand environments.

Sonic Automotive Dealerships needed to provide their locations with consistently branded cabinetry, desks, and workstations across their network. They turned to StudioCraft to deliver these solutions, and the images above reflect the quality of product that can be expected.

The specific bespoke items that StudioCraft engineered were sales manager desks, printer stands, service desks, and product displays. The team accommodated a variety of sizes in product and navigated site conditions unique to each location.
