

BEST OF MODULAR + MILLWORK

Corewell Health
Grand Rapids, MI

In collaboration with a furniture dealer, the StudioCraft team created state-of-the-art nurse stations for Corewell Health.

The nurse stations were built on a curve, seamlessly blending with the hospital's architectural details to create an environment that enhances both functionality and aesthetic appeal.

Each station was fitted with a custom 3Form facade containing real ginkgo leaves, which serves as a shield against everyday wear and tear.

StudioCraft created these stations with effortless installation in mind by combining modular furniture with bespoke elements. This modularity allowed us to easily expand the station on site to accommodate a growing staff.
