

FUNCTIONAL FOCAL POINT

County of Orange Building
Orange County, CA

As part of a government facility project, a dealer partner collaborating with Gensler brought StudioCraft in to produce a custom breakroom island for the County of Orange. The architect envisioned a 30-foot-long island that would serve as both a functional piece of furniture and a visual focal point for the space.

StudioCraft delivered a clean, durable solution featuring a mitered-edge Pentel Quartz countertop, which we intentionally sourced to match other surfaces throughout the building. The island is clad in high-performance laminate and includes integrated access panels for power, balancing aesthetics with functionality.

Through close collaboration and thoughtful detailing, we helped realize a custom design element that aligned with the broader architectural vision and added lasting value to the space.
