

CREATING A DESIGN- FORWARD WORKPLACE

Pharmaceutical Company HQ
New Jersey

For the new headquarters of a world-class pharmaceutical company in New Jersey, StudioCraft was brought in to produce fully custom furniture pieces that blend sophisticated design with necessary workplace functionality.

The centerpiece of the space is a striking 30-foot table, built in three sections using ½-inch Dekton stone. The table features an expertly executed radius curve knife edge detail, integrated power, and built-in luxury lighting fixtures. Tambour legs add warmth, texture, and the highly designed appearance that the client desired.

StudioCraft also produced a series of security desks kiosks, or “host stands,” designed to complement the overall aesthetic of the space. Featuring similar materiality, integrated bronze lighting, and textured chalk paint finishes, they help create a cohesive visual experience while supporting the practical needs of the staff.
